

Product Safety Manager

Implementation, maintenance, and compliance of food packaging safety and quality programs for Azuma's manufacturing site and warehouse sites.

Implement various food packaging, safety and quality programs. Review applicability and suitability of the HACCP program for new products. Participate in customer and 3rd party audits including audit preparation and action item follow-up. Contribute to food safety and quality system improvements and corrective actions based on internal and external audit results. Facilitate all audits initiated by external regulatory agencies.

Maintain and revise food packaging safety and quality procedures. Assist with customer complaint investigation and manage nonconforming in-process and finished product. Research and develop new packaging design that will be used to package Azuma's food products. Conduct research on packaging materials to determine most sustainable options for Azuma Foods.

Minimum requirement: Bachelor's degree in Materials Science plus 2 years' experience in job offer or Packaging Engineer.

Apply to: Personnel Department, Azuma Foods Int'l Inc., USA, 20201 Mack Street, Hayward, CA 94545.
